Amadeus

The new tourist platform testing

Challenge

Amadeus provides the technology which keeps the travel sector moving - from initial search to making a booking, from pricing to ticketing, from managing reservations to managing check-in and departure processes. The company was born when Air France, Iberia, Lufthansa and SAS agreed to create a new global distribution system in 1987. Today, Amadeus operates in 195 countries with a worldwide team of more than 11,000 people.

Amadeus approach to business is innovation. The company was recognized in December 2014 as the leading European investor in R&D for the travel and tourism sector by the EU Industrial R&D Investment Scoreboard.
